

**U.G. 3rd Semester Examination - 2020****COMMERCE****Course Code : BCOMSERT304****Course Title : Basics of Computer Application in Business**

Full Marks : 50

Time : 2 Hours

*The figures in the right-hand margin indicate marks.*

Answer all questions by choosing correct alternative:

2×25=50

1. Modem is used mostly for–
  - a) File system
  - b) A modem empty memory module
  - c) Connecting to internet
  - d) None of the above
2. Which among following is not a browser?
  - a) Opera
  - b) Chrome
  - c) Firefox
  - d) Casio
3. What is internet?
  - a) a single Network
  - b) a vast collection of different network
  - c) interconnection of local area network
  - d) interconnection of wide area network
4. Desktop and Personal computers are also known as
  - a) Super computer
  - b) Quantum computer
  - c) Mainframe computer
  - d) Micro computer
5. Which menu appears after starting Tally for the 1st time?
  - a) Gateway of Tally
  - b) Company info
  - c) Display company info
  - d) None of these
6. Storage which stores or retain data after power off is called–
  - a) Volatile storage
  - b) Non-volatile storage
  - c) Sequential storage
  - d) Direct storage
7. Main memory of computer is–
  - a) internal
  - b) external
  - c) (a) and (b) both
  - d) auxiliary
8. The direction of a rectangular page for viewing and printing is called–
  - a) Orientation
  - b) Direction
  - c) Print layout
  - d) Preview
9. CPU consist of following parts–
  - a) CU and Main memory
  - b) CU and ALU
  - c) Main Memory and Storage
  - d) Operating System
10. Which of the following is not an operating System?
  - a) Windows
  - b) Linux
  - c) Oracle
  - d) DOS
11. Powerpoint representation is widely used as
  - a) Note outlines for teachers
  - b) Project Presentation for students
  - c) Communicating of planning
  - d) All of above

12. What is the file extension of Power point Application  
a) .docx                      b) .ppt                      c) .xls                      d) .jpeg
  13. URL stands for–  
a) Unique reference label                      b) Uniform reference label  
c) Uniform resource locater                      d) Unique resource locater
  14. Which one of the following is not a search engine?  
a) Bing                      b) Google                      c) Yahoo                      d) Windows
  15. The primary function of the \_\_\_\_\_ is to set up the hardware and load and start an OS.  
a) System Program    b) BIOS                      c) Register                      d) Memory
  16. A light sensitive device that converts drawing, printed text or other images into digital form is  
a) Keyboard                      b) Plotter                      c) Scanner                      d) OMR
  17. Which of the following protocols is used for www?  
a) FTP                      b) HTTP                      c) W3                      d) All of the above
  18. Fifth generation computers are based on  
a) Artificial Intelligence                      b) Programming Intelligence  
c) System knowledge                      d) VLSI
  19. The brain of any computer system is  
a) ALU                      b) Memory                      c) CPU                      d) Control Unit
  20. Which part interprets program instructions and initiate control operations?  
a) Input                      b) Storage Unit                      c) Logic Unit                      d) Control Unit
  21. The section of the CPU that selects, interprets and sees to the execution of program instructions  
a) Memory                      b) Register Unit                      c) Control Unit                      d) ALU
  22. ASCII stands for  
a) American standard code for information interchange  
b) All-purpose scientific code for information interchange  
c) American security code for information interchange  
d) American Scientific code for information interchange
  23. Which device of computer operation dispenses with the use of the keyboard?  
a) Joystick                      b) Light Pen                      c) Mouse                      d) Touch Panel
  24. Which output device is used for translating information from a computer into pictorial form on paper?  
a) Mouse                      b) Plotter                      c) Touch panel                      d) Card punch
  25. The device that can both feed data into and accept data from a computer is  
a) ALU                      b) CPU  
c) Input – Output device                      d) All of the above
